

CONSTRUCTION

ABOUT US

JD Construction is a construction management firm that translates architectural designs into concrete reality. We specialize in property development, construction engineering for the public and private sector catering to both wet and dry construction.

Our contribution in any construction project is to integrate a capable consortium of architects, structural engineers, mechanical engineers, electrical engineers, plumbers and interior designers, to deliver a synchronized project that adheres to performance specifications.

MISSION & VALUES

Efficiently and effectively deliver quality work, against all odds, surpassing the expectations of the market and in accordance to the dreams our clients and laws that govern the land all the while considering the trends in the market. To achieve that we are guided three core values:

- *Timely delivery*
- *Passion for each project*
- *Passion for client satisfaction*

DESIGN & INNOVATION

JD Construction creatively manipulates technology in favour of architectural designs, so that the final construction, space and ambience reflect functional, technical, social, environmental and aesthetic considerations.

PORTFOLIO

Our innovation considers project management aspects that influence structural integrity, scheduling, cost estimation and construction administration.
